Relevant Experience

Jan 2026- PRESENT

DAPL IT Services [Contractor] - Mobile Application Developer

- Mobile Online Banking Application Maintenance and New feature integrations .
 - **REST API** integration
 - Feature First Clean Architecture
 - BLoc State Management
 - Mini Applications Integration (Flutter Web Applications in Flutter Mobile App)
 - Ping SDK integration
 - Dynatrace and AppsFlyer Integration
 - Thales NFC Integration
 - Push Notification Integration
 - Developer Tooling Improvement (Build Scripts)

July 2023 - PRESENT

[Freelance] - Mobile Application Developer

- Project 1: Developed a mobile application used for multi store management. A combination of point of sales and menu management system.
 - **REST API** integration
 - Thermal printer integration via Bluetooth (Classic and BLE) (used **platform channels** for printer SDK integration using obj-C/Swift in iOS) (StarXpand SDK and Epson Epos)
 - Image and video capturing
 - Media editing (image and video viewport cropping with **Media3 and AVFoundation**) (used **dart isolates** to prevent main thread freeze). Also integrated Android Native API using Kotlin.
 - **MVVM** code structure/architecture with riverpod for state management
- Project 2: Developed an electric vehicle charging station map. Includes navigation, account tiers, station comments with media and user based station detail corrections suggestions.
 - **REST API** integration
 - Image capturing and cropping
 - Google Maps API integration (SDK, Geolocation, Routes and Places)
 - Maps application integration (Google, and Apple)
 - Firebase Auth Integration
 - Device **Geolocation**
 - **MVVM** code structure/architecture with riverpod for state management

Other Experience

October 2023 - August 2025

Accenture, Inc. [Full Time] - Reports and Measurement Analyst/Business and Technology Integration Analyst

- Consistently recognized as a **top performer**, resulting in the receipt of **two A-list awards**.
- Developed and implemented the **Operations SLA and KPI Metrics Dashboard** to standardize performance tracking. Engineered robust **Data Pipelines** that successfully automated complex ETL processes, significantly improving data efficiency.

- Created custom **Web Apps** to serve as specialized tools for use cases a standard dashboard could not accommodate, utilizing **SQL, Javascript, HTML, and CSS with Google Apps Script** to manage data **CRUD** (Create, Read, Update, Delete), cleanup, transformation, and reporting. These solutions included developing comprehensive **dashboards, data pipelines, and automated action workflows**.
- Served as a **Subject Matter Expert (SME)**, providing guidance on automation and custom use case web applications for operations. Initiated and executed **automation developments** for the team's routine daily and monthly business-as-usual (BAU) activities.
- Developed a high-utility tool that was subsequently **cascaded and replicated** across other different projects for broad organizational benefit.

March 2021 - September 2023

Mighty Construction [Full Time] - Office Engineer

- Developed database and systems for payroll, contracts, project expenses, project collections, materials purchase and delivery monitoring using MS Access and VBA
- Used VBA along with MS Excel for overall project analysis (budget, expense, profit). Also assisted in preparation of project bidding detailed estimates.

Personal Projects

- **Dart File Tree** - Terminal Filetree Explorer for **Helix IDE** integration built with Dart - https://github.com/popodepo123/dart_filetree
- **Rust File Tree** - Terminal Filetree Explorer for **Helix IDE** integration built with Rust- https://gitlab.com/godoytristanh/dart_filetree/-/tree/main/rust_filetree?ref_type=heads
- **Flutter Hotreload** - TUI Flutter Hotreload Application for Terminal IDE integration - https://gitlab.com/godoytristanh/flutter_hotreload
- **Flutter Simple Architecture (FSA)** - A CLI Application to easily and quickly bootstrap and scaffold clean architecture with batteries included - <https://gitlab.com/godoytristanh/fsa>
- **Lapit- In-progress** - An apartment/condo rental listings application. Searching nearby apartments from your desired area or work made it easy.

Education

June 2014 - April 2019 - Pamantasan ng Lungsod ng Valenzuela - *BS in Civil Engineering*

Awards / Certificates

Manulife Ureka Innovation Camp 2016 Consultant Developer for ETSI Nexus App (3rd Place) (Ionic Prototype Application)

PRC Civil Engineering Professional (0176577)
